

The Sierra Conservation Project is proud to announce that it will be expanding its current recycling programs. SCP will work with developers to ensure newly finished major construction projects in the Town of Mammoth Lakes have recycling opportunities for residents and visitors. The Sierra Conservation Project and The Town of Mammoth Lakes are working together to assist new resort developments in implementing recycling programs to reduce environmental impacts. The aim of the project is to provide convenient recycling opportunities within the common areas and rental complexes, as well as the restaurants, bars, corporate business and offices that will accompany new resort developments.

This is a joint effort between The Sierra Conservation Project, The Town of Mammoth Lakes and the California Department of Conservation to provide a unique opportunity for developers to set up their projects with professional and effective recycling infrastructure at no cost.

The Sierra Conservation Project will conduct an on-site analysis of your project. We will then create an implementation plan and deliver the recycling infrastructure needed to start an efficient and effective recycling program for your Mammoth Lakes project.

- 1. We will provide the infrastructure needed for your participation in this recycling program.** *SCP will assist in designing a custom recycling program for your project and provide all start-up materials.*
- 2. We deliver and install specialized recycling collection containers and equipment to meet the specific needs of your development.** *Indoor and outdoor containers are costly and often limit business owner's ability to implement recycling programs. This program provides containers at no cost to you.*
- 3. The Sierra Conservation project will provide educational material and assist in the training of your staff to ensure the efficient operation of the recycling program.**
- 4. Finally, Sierra Conservation Project services recycling containers on a weekly basis or as needed to keep your program running smoothly without additional work for your employees.** *We handle the separation and preparation of recyclable materials, your staff simply places recyclables in provided containers and we handle the rest. Pickup and sorting service costs are assessed individually and depend on the size and nature of your project.*

Benefits of recycling at your resort project

- ✓ **Cost savings on trash removal services**

Many local business entities have realized the benefit of recycling their glass, plastic, aluminum, bi-metal, cardboard and paper materials rather than throwing them away to be dumped in our local landfill. Recycling will save you money on trash removal fees while reducing the environmental impacts of your project.
- ✓ **Specialized recycling containers provided at no cost to you**

There are many recycling container options to choose from. Bear-proof containers are recommended for most outdoor recycling container applications. Indoor recycling systems provide a uniform look and convenient recycling locations for office and professional applications.
- ✓ **Reduced environmental impacts of your development**

By participating in this program your company will be up to date with the popular practice of green building. Conservation of natural resources is a key element to making your project more modern. As a participant of the Sierra Conservation Project, your company will be listed as a participating “green business” on our web site and in our newsletters. There is more information on green building and how it pertains to our program at the web site: www.recyclesierra.com.
- ✓ **Uniform and professional look**

Plaza containers come in many styles to match the look of your existing trash containers. They provide patrons and employees with convenient recycling opportunities throughout your mall, shopping center and transit stops.
- ✓ **Recycling at restaurant and bar locations**

We provide convenient and attractive containers that facilitate collection of all recyclable material produced in your kitchen, bar, and offices.
- ✓ **Promotes your company as an environmentally responsible member of the community**

Our experience has shown that visiting guests and members of the community will recognize and greatly appreciate the recycling opportunity that this program will provide. Participant decals and signage are provided to show your patrons your company is doing its part to protect our environment.

Call 760-914-0115 to schedule your free site analysis and take advantage of this opportunity while funds last.

Examples of existing programs in Mammoth Lakes

The Village at Mammoth
